

Core Concepts

- 1 What is an API?
- 2 What is a web API?
- 3 What is a REST API?
- 4 What is an endpoint?
- 5 What are HTTP Verbs?
- 6 What is the difference between HTTP and HTTPS?
- 7 What are status codes?
- 8 What is the difference between authentication and authorization?
- 9 What is a browsable API?
- 10 What is CORS?
- 11 How to fix CORS error in Django?
- 12 What is the difference between stateful and stateless?

Django Rest Framework

- 1 What is Django Rest Framework?
- 2 What are benefits of using Django Rest Framework?
- 3 What are serializers?
- 4 What are Permissions in DRF?
- 5 How to add login in the browsable API provided by DRF?

- 6 [What are Project-Level Permissions?](#)
- 7 [How to make custom permission classes?](#)
- 8 [What is Basic Authentication?](#)
- 9 [What are the disadvantages of Basic Authentication?](#)
- 10 [What is session authentication?](#)
- 11 [What are the pros and cons of session authentication?](#)
- 12 [What is Token Authentication?](#)
- 13 [What are pros and cons of token authentication?](#)
- 14 [What is the difference between cookies vs localStorage?](#)
- 15 [Where should token be saved - cookie or localStorage?](#)
- 16 [What are disadvantages of Django REST Framework's built-in TokenAuthentication?](#)
- 17 [What are JSON Web Tokens\(JWTs\)?](#)
- 18 [What are benefits of JWT?](#)
- 19 [What is the difference between a session and cookie?](#)
- 20 [What is the difference between cookie and tokens?](#)
- 21 [What's an access token?](#)
- 22 [What is meant by a bearer token?](#)
- 23 [What is the security threat to access token?](#)

- 24 [What is a refresh token?](#)
- 25 [What are the best practices when using token authentication?](#)
- 26 [What is cookie-based authentication?](#)
- 27 [What are viewsets in DRF?](#)
- 28 [What are routers in DRF?](#)
- 29 [What is the difference between APIViews and Viewsets in DRF?](#)
- 30 [What is the difference between GenericAPIView and GenericViewSet?](#)
